Risks related to our Business

The Company, and the Securities of the Company, should be considered a highly speculative investment. The following risk factors should be given special consideration when evaluating an investment in any of the Company's Securities:

General legislative risk

Although management believes that the revenues generated from the Company's Gaming Software and from the Company's Auction Website represent lawful businesses, there is the risk that the legality may be challenged by Canadian or other legal authorities. If the legality is challenged by any legal authority and the challenge is sustained, it may have a material adverse impact on the financial affairs of the Company.

Competition

The marketplace for the Company's Gaming Software and for the Company's Auction Website is constantly undergoing changes, is intensely competitive and is subject to changes in customer preferences. The Company's products and services compete against those of other companies that have greater financial, marketing, technical and other resources than those of the Company.

Internet and system infrastructure viability

Any changes in the internet's role as the premier computer network information service or any shutdown of internet services by significant internet service providers will have an adverse material impact on the Company's ability to generate revenues. Furthermore, the Company can be severely and adversely affected from power failures, internet slowdowns or failures, software slowdowns or failures and hackings.

Reliance on key personnel

The Company relies heavily on its employees, the loss of any of whom could have an adverse effect on the Company.

Customer concentration

The Company also relies on its licensees for the operation of the Company's Gaming Software, the loss of any of which could have an adverse effect on the affairs of the Company.

In respect to the Company's Auction Website, the Company has to attract and retain customers to its Auction Website. Should the Company be unable to attract and retain customers to its Auction Website, then this will have material adverse effect on the affairs of the Company.

Payment processing

Changes in policies of companies, financial institutions or banks, that handle credit card transactions and/or other types of financial transactions for on-line gaming or for on-line auctions, can have an adverse impact on the business and financial affairs of the Company.

Foreign exchange rates

The profitability of the Company can be affected by fluctuations in the exchange rate of the US Dollar in relation to the Canadian Dollar due to the fact that the Company's revenues are mainly generated in US Dollars while a major portion of the Company's expenses are incurred in Canadian Dollars.

Share price volatility and liquidity

The market price of the Company's common shares has experienced considerable volatility and may continue to fluctuate in the future. Factors such as the Company's quarterly results, changes in existing legislation, new legislation, technological changes and general market conditions may adversely affect the market price of the Company's common shares. There is a limited trading market for the Company's common shares and the ability of investors to sell their shares or the price at which those shares may be sold cannot be assured.

Growth management

If the Company's Gaming Software gains traction in the market or if the Company's Auction Website attracts a significant number of customers, rapid growth may occur which may result in certain strains on the Company.

Dilution

There are a number of outstanding securities and agreements pursuant to which common shares of the Company may be issued in the future. This would result in further dilution to the Company's shareholders.

Revenues and Dividends

While the Company currently generates revenues, the Company has not yet established a long term pattern of consistently generating meaningful revenues. The Company intends to retain its earnings in order to finance growth. Furthermore, the Company has not paid any dividends in the past and does not expect to pay any dividends in the future.

Disruption in Trading

Trading in the common shares of the Company may be halted or suspended for certain reasons, including, but not limited to, the failure by the Company to submit documents to the Regulatory Authorities in the time periods required.

The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquid funds to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The contractual financial liabilities of the Company as of March 31, 2012 equal $335,122 (March 31, 2011: $249,474). All of the liabilities presented as accounts payable are due within 90 days of March 31, 2012.

(c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, and interest rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return on capital.

(i) Currency risk

The Company is exposed to foreign currency risk, as it holds cash denominated in US dollars. The Company has not entered into any foreign currency contracts to mitigate this risk.

The Company is not exposed to significant currency risk on its financial instruments at year-end. The Company's reported earnings include gains/losses on foreign exchange, largely reflecting revaluation of its foreign operations. The future foreign exchange gain or loss would change based on the level of foreign operating activities.

At March 31, 2012, the Company is exposed to currency risk for its US dollar equivalent of financial assets and liabilities denominated in currencies other than US dollars as follows:

	Held in US dollars (stated in Canadian dollars)	
	March 31, 2012	**March 31, 2011**
Cash	$ 10,567	$ 23,213
Accounts receivable	10,287	59,818
Accounts payable	(683)	(31,241)
Net financial assets (liabilities)	$ 20,171	$ 51,790

Based upon the above net exposure as at March 31, 2012 and assuming all other variables remain constant, a 5% depreciation or appreciation of the US dollar relative to the Canadian dollar could result in a decrease/increase of $1,009 (2011 - $2,590) in the Company's net losses.

(ii) Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. Interest earned on cash is at nominal interest rates and therefore the Company does not consider interest rate risk to be significant. The Company has no interest-bearing financial liabilities.

(iii) Other price risk

Other price risk is the risk that the fair or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk. The Company is not exposed to significant other price risk.

Off-balance sheet arrangements

The Company does not have any off-balance sheet arrangements.

Significant Accounting Policies

The Condensed Interim Consolidated Unaudited Financial Statements have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS").

Disclosure over Internal Controls

Disclosure controls and procedures ("DC&P") are designed to provide reasonable assurance that all relevant information is gathered and reported within the time periods required by securities regulations and that information required to be disclosed is accumulated and communicated to management. Internal controls over financial reporting ("ICFR") are intended to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Canadian generally accepted accounting principles.

Venture Issuers are not required to provide representations in their annual and interim filings relating to the establishment and maintenance of DC&P and ICFR, as defined in National Instrument NI 52-109. In particular, the CEO and CFO certifying officers do not make any representations relating to the establishments and maintenance of (a) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded and reported within the time periods specified in securities legislation and (b) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP. The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in their certificates regarding absence of misrepresentations and fair disclosure of financial information. Investors should be aware that inherent limitations on the ability of certifying officers of a Venture Issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.
